Description

HDMI 2.0 optical fiber detachable extender, HDFX-300, extends HDMI 2.0 signal up to 200m (656feet) and transmits 4K UHD (4096x2160) at 60Hz over one duplex LC multi-mode fibers. Leading-edge technology of Opticis allows long distance transmission of 4K signal without any video/audio degradation.

HDFX-300 is designed compact enough to be fitted into various installation environments. It gives slim, light, easy installation with perfect electrical isolation, but without electrical hazard and interference.

High-Retention HDMI connector, which allows for more retention force than standard HDMI connector, prevents accidental disconnection.

HDFX-300 is compliant with HDMI standards features like CEC, EDID and HDCP 2.2 for better installation flexibility and compatibility.

HDFX-300 can be operated by either 5V power from HDMI source(Tx only) or USB power. Auto Power-Switching feature makes it more reliable on its power supply.

The shipping items are shown as follows;

- 1) One (1) Transmitter (Tx) and One (1) Receiver (Rx)
